

---

The Stronghold Crusader Extreme Trainer is a set of events, levels and a campaign designed to help new players become more comfortable with the game through practice. If you want to improve your skills in Stronghold Crusader Extreme, this is the perfect trainer for you! I've been playing Stronghold Crusader Extreme since its release and have found that it's difficult at first because tower defense games are different from any other type of real-time strategy game. Once you get used to how they play, though, it becomes easier and easier as time goes on. However, I know that some new players have given up on the game because they don't feel like it's worth their time or effort anymore. This is why I have decided to create the Stronghold Crusader Extreme Trainer. I have taken all of the information you need to learn how to play Stronghold Crusader Extreme, which you can find in the manual, and recorded it in this advanced level format. This is what I like to call "Newbie's Guide." It's my hope that everyone who reads it will not only get used to Stronghold Crusader Extreme but also enjoy it.

With its original release on PS2, Xbox, Windows and Mac OSX in 2004, Stronghold Crusader has become one of the most popular titles amongst RTS enthusiasts. Many years have since passed and a lot of things have changed, but the majority of the gaming world is still awaiting a sequel. Stronghold Crusader 2 was announced in 2008 and was expected to be released in 2010. Though it has been pushed back many times due to real-life issues such as the recent global economic crisis, the developers at Firefly Studios insist that they are doing everything they can to get it out as soon as possible. The official date for Crusader 2's release is July 26th, 2011. It will be available on Xbox 360 and PC (Windows). Stronghold Crusader 2 will be, like its predecessor, a Real Time Strategy game based on medieval times. The developers' main goal for this sequel was to make the game much more accessible for beginners while still playing like the original Stronghold Crusader. One of the main features in this game is that there are no longer towers in the game; you can build your own castle in any way you see fit. You can also build siege equipment and ram it into your enemy's defenses. The game does not contain much in the way of diplomacy (like trading), but it does feature eight different single-player campaigns (one which you can play online) and online multiplayer for up to 8 players. In 2013, "Stronghold Crusader Extreme" was released as a freeware version of the game for Windows. It is made up of a bunch of scenarios for single player, multiplayer and a campaign.

The Stronghold Crusader Extreme soundtrack is a two-disc album by the electronic music duo Mindfields, who composed it after being impressed by the gameplay video that was released for the game. The album features five remixes of "Conquer All" (which make up four tracks) and three other songs ("The Knight's March", "Theme" and "Time to Build"). It also features an exclusive track called "Black Knight's Theme".
